

RESTRICTED

**SECTION 39-PERIODIC MAINTENANCE RECONNAISSANCE**

0810. Periodic maintenance reconnaissance should be carried out to ascertain:
- a. The density and type of traffic using the road.
  - b. The present condition of the road, and the progress of maintenance work.
  - c. The quality of maintenance work, and the results obtained by the various techniques adopted.
  - d. Whether additional labor or plant are required, or whether the existing maintenance organization can be reduced.
0811. Inspections carried out in adverse weather conditions are particularly valuable.
0812. Results are best recorded on an area road-situation map.
