

RESTRICTED

**SECTION 8**

**CONCLUSIONS**

0801. a. A large proportion of UXBs fitted with fuzes may explode if interfered with by persons without expert knowledge.
- b. A percentage may explode if vibrated or subjected to certain other influences.
- c. A percentage may explode automatically on preset period after falling.
0802. Bombs fitted only with airburst, proximity, impact and short delay fuzes are normally safe if left undisturbed.
0803. Long delay and anti-disturbance fuzes are unlikely to be fitted in armour piercing, penetration or blast bombs or in fragmentation bombs which are of conventional bomb shape.
- 0804-0900. Reserved.
